# Terms of sale

1. All prices exclude Value Added Tax (VAT). There is no VAT on export to countries outside of the EC however this applies only to parts which are despatched outside of the EC and not to parts that are collected, as this VAT is refunded by the UK Customs at your point of departure
2. Carriage, post and packing are extra and is subject to a minimum charge of £2.50 for posting. Following day delivery by UPS at £6.95 for small packets and £10.50 over 10 Kilos. Max 20K
3. All prices are subject to change without notice.
4. All prices are shown in Pounds Sterling excluding VAT. Payment by other currencies are at the exchange rate as at date of despatch or collection.
5. Euro-cheques are not accepted
6. Only **VISA** and **MasterCard** credit cards are accepted if forwarded to cardholders address.
7. If payment is by cheque sufficient time must be allowed for clearance.
8. Goods are sent at purchaser's own risk. We do not accept responsibility under any circumstances for goods damaged or lost in transit. If insurance is required, please advise when placing your order and we will charge at cost.
9. A 20% handling charge will be made on parts returned for credit that have been correctly supplied. Credit will not be given unless a copy of the original invoice is provided. No parts will be accepted for credit after 28 days.
10. We do try to despatch orders complete but this is sometimes not possible. If the balance is due within 2/3 weeks we will despatch then, unless advised otherwise. No minimum postage charges will be applied to balance orders and despatches will only be charged at cost.

## Distributor Rebuilds

To fully rebuild your distributor. The advance curve

electronically checked and set to makers specification.

Excludes points, capacitor, rotor and bearings.

|       |                      |        |      |
|-------|----------------------|--------|------|
| 0115A | Ferrari Dino 206-246 | £95.00 | Each |
|-------|----------------------|--------|------|

---

## Distributor Rebuild Kits

Complete kit of all the necessary components to rebuild your own distributor. Excludes points, capacitor, rotor and bearings. Rotor weights are now machine cut in steel and fitted with hardened flanged pins for long life.

|       |                      |        |      |
|-------|----------------------|--------|------|
| 0120A | Ferrari Dino 206-246 | £75.50 | Each |
|-------|----------------------|--------|------|

---

## Distributor Spares

|       |                                                 |         |      |
|-------|-------------------------------------------------|---------|------|
| 0124A | Marelli distributor cap (very early 206)        | £92.50  | Each |
| 0125A | Marelli distributor cap                         | £95.50  | Each |
| 0130A | Marelli points                                  | £16.95  | Each |
| 0140A | Marelli rotor                                   | £9.90   | Each |
| 0145A | Capacitor                                       | £3.95   | Each |
| 0150A | Fibre drive connector                           | £22.50  | Each |
| 0155A | Distributor gasket                              | £2.55   | Each |

## Door Handles

|       |                                         |        |      |
|-------|-----------------------------------------|--------|------|
| 3955F | Inner door handles                      | £25.00 | Each |
| 3968F | Pull handles for bonnet/boot/petrol     | £15.00 | Each |
| 4061F | Outer door handle shaft stainless steel | £17.50 | Each |

---

## Vent Window Catch

|       |                                |        |      |
|-------|--------------------------------|--------|------|
| 3969F | Vent window catch complete LHS | £22.50 | Each |
| 3970F | Vent window catch complete RHS | £22.50 | Each |

---

## Window Motors

|       |                        |        |      |
|-------|------------------------|--------|------|
| 4060F | Electric window motors | £75.00 | Each |
|-------|------------------------|--------|------|

---

## Steering Wheel Centre

|       |                                           |        |      |
|-------|-------------------------------------------|--------|------|
| 4035F | Ferrari (prancing horse) centre horn push | £17.50 | Each |
|-------|-------------------------------------------|--------|------|

---

## Boot, Engine, Petrol Pull

|       |                                                  |         |      |
|-------|--------------------------------------------------|---------|------|
| 4040F | Complete pull with cables etc (3 lever)          | £147.50 | Each |
| 4041F | Aluminium back plate (replaces plastic moulding) | £85.00  | Each |

# Carburettor Linkage Kits

Do you find it almost impossible to set up the carburettors on your Ferrari 308 engined car?

Have you given up trying to get the carburettors not only to open together but also to close together?

**We have the answer** - you need one of our carburettor linkage modification kits. It does away with the pin on the throttle linkage arm and is replaced with a ball and socket which is used on most linkage systems. The ball locates in a hardened steel socket connector which is fitted to the throttle shaft, as in the original installation.

This is a very easily installed conversion kit and makes the setting up of the carburettors very simple.

After fitting there will be an improved smoothness in response and when the throttle is released all the carburettors return promptly and evenly to their idle stop screws, thus avoiding flooding and uneven idling.

The kit comes complete with all the necessary parts including a riveting tool for the ball end. All parts are plated for corrosion control.

The basic kit is for four twin choke carburettors and contains:-

Part No. 2020F

- 4 Linkage arm ball connectors.
- 4 Socket connectors.
- 4 Locating clips.
- 8 M6 nuts.
- 8 6mm spacers.
- 1 Riveting tool.
- 4 Carburettor arm lock tabs.
- 1 Full set fitting instructions

# Engine Rebuilds 206-246

We specialise in rebuilding Dino engines to concours standard. After rebuild all engines are run for 2 hours on a run-up stand and then cam, valve clearances and ignition timing are checked and reset if necessary. Also oil pressures, alternator and starter are tested. The engine is then returned to you fully set up and ready to install.

## Engines

1. Crankshaft is dynamically balanced with front pulley and flywheel.
2. Pistons and Conrods are balanced.
3. Cylinder heads pressure tested.
4. Crankshaft is crack tested.
5. Alternator and starter motor rebuilt.
6. Water pump rebuilt.
7. Distributor rebuilt and correct advance curve set.
8. Oil pump surfaced and rebuilt if necessary.
9. All valve seat areas re-profiled for efficient mixture flow.
10. All valve springs checked for correct tension and length.
11. Block descaled.
12. All parts replated as original BZP and yellow passivated.
13. Carbs. fully rebuilt, accuracy of manifold to head checked.

## Options

1. High compression pistons.
2. Hi-performance camshafts.
3. Hi-performance air filters.
4. Electronic ignition.
5. Lightened flywheel.(suitable for road use)
6. Uprated valve springs.
7. Larger carbs fitted 42or 44DCNF

It is impossible to quote firm prices on the cost of rebuilding an engine but as a guide £4500 to £5000 for a 206-246 is the likely cost of a standard engine. This assumes that there are no major problems like dropped valves, cracked heads or cracked crankshaft.
